A RESPONSE FROM THE HOMEOWNER IS REQUIRED.

The Federal Environmental Protection Agency (EPA) whose enforcement agency is the Pennsylvania Department of Environmental Agency (DEP) has passed a new ruling concerning Lead and Copper.

This mandate states that the municipality must inform DEP of the water service line leading into each home or commercial facility that it serves with water.

The Borough is in the process of reviewing records to determine the composition of your water service line up to the curb box (the Borough's portion).

The Borough needs your help in determining the rest of the water service line to comply with this requirement.
